Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 July 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

RCE

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/17/07 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6, 14-15 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Dennis (4,560,226).

Regarding claims 6 and 20, Dennis, figures 2 and 4 show a connector (10) comprising:

- a plurality of terminals (11);
- a connector housing receiving the terminals, each of the terminals including:
- a terminal connecting portion (12) having a tubular shape and receiving a mating terminal (12');

- a wire press-contacting portion (13) including a press-contacting blade (50) for press-contacting a wire, and the press-contacting blade having a blade width larger than a width of the terminal connecting portion; and
- an interconnecting portion (14) connecting the terminal connection portion and the wire press-contacting portion,

wherein a press-contacting portion direction in which the wire is press-contacted with the wire press-contacting portion is parallel to a terminal fitting direction of the mating terminal into an internal space of the terminal connecting portion;

wherein the interconnecting portion has a horizontal portion (40) and vertical portion (37) with respect to the terminal fitting direction, the vertical portion extends past the terminal connecting portion in a direction perpendicular to the terminal fitting direction, such that the blade is spaced away from the terminal connecting portion by the horizontal portion and the blade is elevated above the terminal connecting portion in the direction perpendicular to the terminal fitting direction; and

wherein the terminal connecting portion of the terminals are received in the connector housing in parallel so that the press-contacting blades are arranged in a staggered manner.

Regarding claim 14, the press-contacting blade is formed by a flat plate having a groove (33, figure 2) that the wire is press-contacted.

Regarding claim 15, the wire press-contacting portion is spaced a prescribed distance from the terminal connecting portion in a direction perpendicular to the press-contacting direction.

Allowable Subject Matter

4. Claims 12, 16-18 and 21 are allowed.
5. Claims 7 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is an examiner's statement of reasons for allowance:

The claim is allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a support jig for receiving the press-contacting force through the inner wall of the connector housing, as set forth in the claimed combination.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

8. Applicant's arguments with respect to claim 6 have been considered but are moot in view of the new ground(s) of rejection.
